Print Text or Graphics *FAST*

Introducing the *LATEST* range of Gossen, Müller & Weigert (*formerly ITT Instruments*) industrial panel mounting printers. These fast, compact (144 x 72mm DIN size), graphics printers are ideal for printing measured data, status and fault reports in many instrumentation, automation and industrial control applications.

The IPP 144-40G's multi-standard RS 232/422/485/TTY serial data interface provides compatibility with many controllers, PCs, PLCs, DPMs, counters and message displays. Their long-life, fixed head, thermal mechanism, enables high-speed, high resolution printing (8 to 48 columns) of alphanumeric text, barcodes or bitmap graphics on 80mm 'document proof' thermal paper (image retention up to 10 years in normal conditions). Available with a choice of AC or DC supply voltages. Optional accessories include paper re-roll unit and protective cover.

The enhanced IPP 144-40GE versions also offer the ability to print pre-stored messages, with embedded variable data, and automatically record date and time. They are compatible with Windows® printer drivers and are available with a second RS 232C, RS 485, Profibus or USB interface to programme text memory, input text or graphics.

Available ex-stock from RS Components Ltd

- IPP 144-40G, 110-230V AC – RS Stock Ref: 478 0564
- IPP 144-40G, 24V DC – RS Stock Ref: 478 0570
- IPP 144-40GE USB, 110-230V AC – RS Stock Ref: 478 0586
- IPP 144-40GE USB, 24V DC – RS Stock Ref: 478 0609
