NEW
Handheld 8.5GHz
Spectrum Analyzer

The new BK-2658 and BK-2650 are compact, lightweight and inexpensive handheld spectrum analyzers available now from Metrix Electronics Ltd.

The BK-2658 covers up to 8.5GHz and is designed for use with the newer wireless signals, such as GPS, 802.11a, 3G, ultra-wideband, and WiMAX. While the BK-2650 covers up to 3.3GHz for testing GSM, CDMA, 80211b & 802.11g Wireless LAN, WiFi and Bluetooth systems.

Both models feature auto-tuning and auto-range operation, and offer similar measurements, including; channel and adjacent channel power, occupied bandwidth, electric field strength (with optional dipole antennas) and magnetic field strength (with optional probe). Setups and measurements can be saved, downloaded or hard copy printed (with optional printer).
