NEW

Enhanced Test & Measuring Instrument Range for 2007

A significantly enlarged range of handheld and bench style test instruments is now available from Metrix Electronics Ltd covering industrial, laboratory, service and training applications. This enhanced range is detailed in the new 2007 Product Guide, which combines the key products from the B+K Precision* and Sefram* instrument ranges

The individual sections in the new guide focus on the following product groups: multimeters, clamp-on meters, electrical testers, recorders, data loggers, environmental testers, power supplies, function generators, oscilloscopes, frequency counters, LCR meters, spectrum analysers, TV field strength meters, network cable testers, process calibrators and accessories.

New products for 2007 include: high specification dual display multimeters, true RMS clamp-on meters, electrical installation testers, 600W electronic loads, function-arbitrary function generators, process calibrators and digital oscilloscopes from 60 to 200MHz.
