NEW

2011-2012 Catalogue of Professional Meters for Digital TV Applications

A new 8-page catalogue, available from Metrix Electronics, details the Sefram meter range for standard and high-definition digital TV measurements.

Models in the 7861 series offer comprehensive measurements of MPEG-2 and MPEG-4 digital terrestrial (DVB-T, DVB-T2, COFDM), cable (DVB-C, QAM) and satellite (DVB-S, QPSK and DVB-S2, QPSK/8PSK) signals. These models feature a 7-inch colour TFT to show TV pictures, spectrum and detailed measurement displays. They have a compact housing, water resistant front panel, durable carrying case, weigh just 2.1kg and are backed by a two year warranty. The premium 7866HD-T2 model also has an integrated GPS receiver for mapping applications.

Three 7806 series models are rugged, highly portable and easy-to-use meters dedicated to digital terrestrial, cable or satellite applications. While the new S-7846 combines terrestrial and satellite measurements. All models have a USB – PC interface to upload frequency plans and download saved measurements.

The latest additions to the range are models to check fibre networks. These models are the 7940 optical power meter and two optical light sources.
